## FOLDING ARM AWNING COMPONENT BOOK

FA62  
FA64

HunterDouglas

## Description

### Range of application

FA62 is a heavy-duty folding arm awning designed for terraces, bungalows, balconies, kiosks, shops, restaurants etc. FA64 provides flexibility at installation and the possibility for a wider awning.

### Operation

External or internal operation by motor. The motor can be completed with automatic controls, for example remote control or sun and wind sensors.

### Installation

The awning can easily be installed directly onto the wall.

### Folding arms

The arm components are manufactured of pressure die casted aluminium and the arm profiles of extruded aluminium. Dyneema® connection over knees improves the stability of the awning. Heavy-duty springs provide an excellent tension of the fabric.

### Components

The installation brackets are manufactured of extruded aluminium. Bushings for roller tube 78 mm are manufactured of pressure die casted zinc.

Powder coated articles have colour code 0001 for white(RAL 9010), 0182 for silver and 0914 for black. Untreated or galvanised articles have colour code 0000. End caps for front profile are manufactured of polyethylene, bushing in self lubricating polyamide. Pigmented articles have colour code 0001 for white, 0049 for black and 0182 for silver. Fasteners are manufactured of stainless steel, zinc plated steel or steel surface treated with Dacro 500 LC. Crank handles in RAL7035.

### Profiles

The front tube and cassette profiles are manufactured of extruded aluminium. Powder coated aluminium profiles have colour code 0001 for white(RAL9010), 0182 for silver and 0914 for black. Roller tube 78 is manufactured of special zinc plated steel.

### Dimensions FA62

Depth 280 mm  
Height 178 mm  
Projection (m) 2.0, 2.5, 3.0 och 3.5.  
Max width 5.0 m  
Pitch angle: 5 - 45°.

### Dimensions FA64

Depth 288 mm  
Height 160 mm  
Projection (m) 2.0, 2.5, 3.0, 3.5 och 4.0.  
Max width 7.0 m (Max 6.0m at 4.0m projection).  
Pitch angle: 5 - 40°.

The maximum measurements are recommended and should not be exceeded. If the installation conditions are difficult, even these dimensions should be reconsidered.

### Nonstandard articles

Article numbers marked "Nonstandard" are not kept in stock, which results in longer delivery times. Minimum order quantities (Min) apply.

*Subject to changes without notice.*

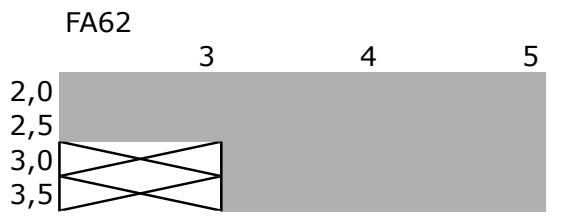

## Information EN 13561

### Overview Wind Classes

Class	Wind Strength (Beaufort)	Wind speed (km/h)	Wind speed (m/s)	Pressure (N/m <sup>2</sup> )
0	1-3	≤ 19	≈ 5,3	< 40
1	4	20-28	≈ 7,7	40
2	5	29-38	≈ 10,5	70

To fulfil the according wind class it is very important that the awning is mounted with the right amount of installation brackets and with suitable fasteners. It must be prevented that the fastening is the weakest link.

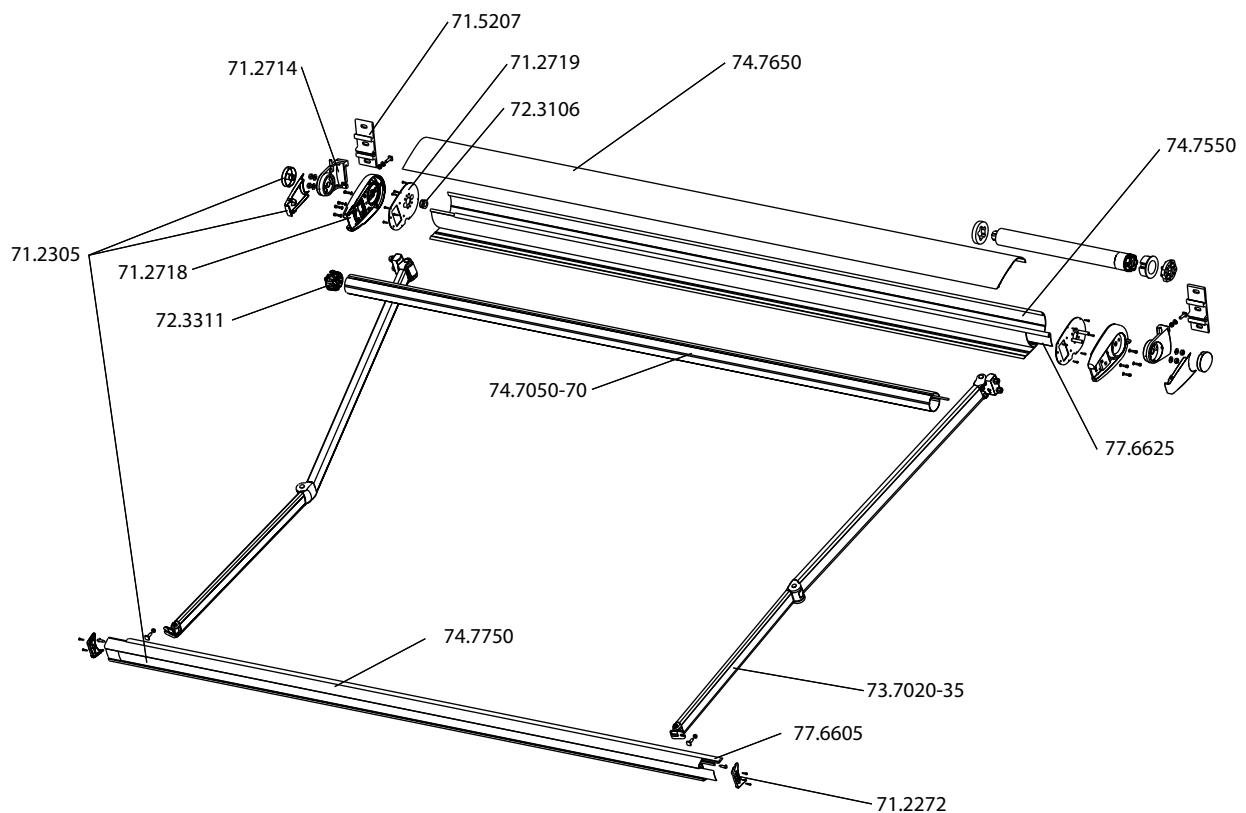

### Wind classification according to EN13561

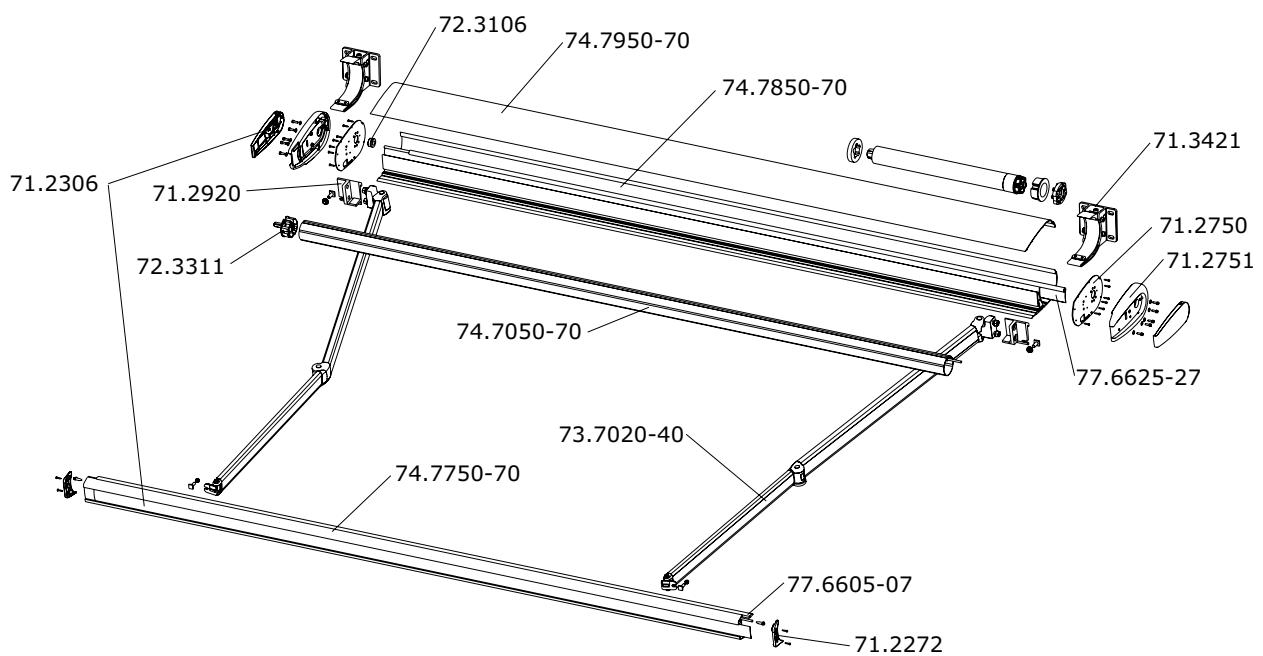

Wind class 2

Wind class 1
